

MINIMIZE CLEAN-UP TIME, MAXIMIZE PRODUCTIVITY.

**OCDC**  
Operator-Controlled  
Discharge Chute

Few things can ruin the look of a perfectly manicured landscape like the unsightly appearance of clippings and debris on sidewalks and in flowerbeds. It's not always easy or possible to keep mower discharge from blowing onto these areas, so you end up spending additional time to clean things up after mowing. This extra clean-up time hurts your productivity and profitability.

The Scag Operator-Controlled Discharge Chute allows the operator to temporarily close-off the cutter deck's discharge opening when mowing along sidewalks, around flowerbeds, etc. Keeping clippings out of these areas allows you precious time to get more jobs done and make more money.

Talk to your Scag dealer today for more information about the Scag OCDC.

OCDC Operator-Controlled Discharge Chute

# OCDC Operator-Controlled Discharge Chute

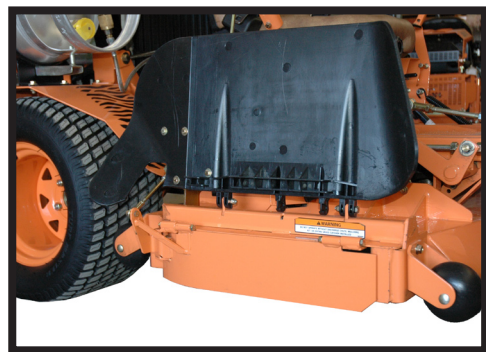

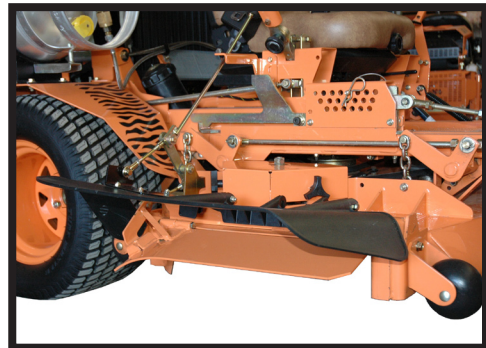

## OCDC Operator-Controlled Discharge Chute

- Allows for fast and easy close-off of clipping discharge to keep debris off of sidewalks, out of flower beds, etc.
- Discharge chute moves opposite the close-off plate in a single movement of the engagement lever for quick conversion on the go.
- Complete discharge chute remains on the deck to maintain safety while mowing.
- Strong steel construction delivers years of reliable use.
- Long handle with rubberized handle provides easy reach from the operator's station for simple engagement and user comfort.
- Custom-engineered fit ensures optimum performance.\*
- Covered by Scag's 90-day accessory warranty.
