Congratulations on owning a Scag Giant-Vac Yard Vacuum! This manual contains the operating instructions and safety information for your Scag Giant-Vac Yard Vacuum. Reading this manual can provide you with assistance in maintenance and adjustment procedures to keep your vacuum performing to maximum efficiency. The specific models that this book covers are listed on the inside cover. Before operating your vacuum, please read all the information enclosed.
WARNING

FAILURE TO FOLLOW SAFE OPERATING PRACTICES MAY RESULT IN SERIOUS INJURY OR DEATH.

- Read this manual completely as well as other manuals that came with your vacuum.
- ALWAYS FOLLOW OSHA APPROVED OPERATION.
- Become familiar with the safe operation of the equipment, operator controls and safety signs.
- DO NOT operate on steep slopes.
- Always travel across slopes.
- Keep all shields in place, especially the discharge chute.
- Before performing any maintenance or service, stop the machine and remove the spark plug wire.
- If a mechanism becomes clogged, stop the engine before cleaning.
- Keep hands, feet and clothing away from power-driven parts.

REMEMBER - YOUR YARD VACUUM IS ONLY AS SAFE AS THE OPERATOR!

HAZARD CONTROL AND ACCIDENT PREVENTION ARE DEPENDENT UPON THE AWARENESS, CONCERN, PRUDENCE, AND PROPER TRAINING OF THE PERSONNEL INVOLVED IN THE OPERATION, TRANSPORT, MAINTENANCE, AND STORAGE OF THE EQUIPMENT.

| This manual covers the operating instructions and illustrated parts list for: |
|-----------------|----------------|------------------|
| YV14-EA190      | with a serial number of | 004A00001 to 004A99999 |

Always use the entire serial number listed on the serial number tag when referring to this product.

SECTION 1

GENERAL INFORMATION

1.1 INTRODUCTION

Your Scag Giant-Vac product was built to the highest standards in the industry. However, the prolonged life and maximum efficiency of your vacuum depends on you following the operating, maintenance and adjustment instructions in this manual.

If additional information or service is needed, contact your Scag Giant-Vac Dealer.

We encourage you to contact your dealer for repairs. All Scag Giant-Vac dealers are informed of the latest methods to service this equipment and provide prompt and efficient service in the field or at their service shop. They carry a full line of Scag Giant-Vac service parts.

- IMPORTANT -

The replacement of any part on this product by other than the manufacturer's authorized replacement part may adversely affect the performance, durability or safety of this product.

Use of other than original Scag Giant-Vac replacement parts will void the warranty.

When ordering parts, always give the model and serial number of your product. The serial number plate is located on the frame next to the engine.

USE ONLY SCAG GIANT-VAC APPROVED ATTACHMENTS AND ACCESSORIES.

Attachments and accessories manufactured by companies other than Scag Giant-Vac are not approved for use on this machine. See Section 6-1.

SAFETY INFORMATION

2.1 INTRODUCTION

Your vacuum is only as safe as the operator. Carelessness or operator error may result in serious bodily injury or death. Hazard control and accident prevention are dependent upon the awareness, concern, prudence, and proper training of the personnel involved in the operation, transport, maintenance and storage of the equipment. Make sure every operator is properly trained and thoroughly familiar with all of the controls before operating. The owner/user can prevent and is responsible for accidents or injuries occurring to themselves, other people or property.

READ THIS OPERATOR’S MANUAL BEFORE ATTEMPTING TO START YOUR YARD VACUUM.

A replacement manual is available from your authorized Scag Giant-Vac Dealer or by contacting Scag Giant-Vac, Service Department at P.O. Box 152, Mayville, WI 53050 or contact us via the Internet at www.giant-vac.com. The manual for this machine can be downloaded by using the model and serial number or use the contact form to make your request. Please indicate the complete model and serial number of your Scag Giant-Vac product when requesting replacement manuals.

2.2 SIGNAL WORDS

This symbol means “Attention! Become Alert! Your Safety is Involved!” The symbol is used with the following signal words to attract your attention to safety messages found on the decals on the machine and throughout this manual. The message that follows the symbol contains important information about safety. To avoid injury and possible death, carefully read the message! Be sure to fully understand the causes of possible injury or death.

SIGNAL WORD:

It is a distinctive word found on the safety decals on the machine and throughout this manual that alerts the viewer to the existence and relative degree of the hazard.

2.3 BEFORE OPERATION CONSIDERATIONS

1. Check the engine oil level and add oil as needed to bring the level up to the FULL mark. See engine owner’s manual for oil specifications.

2. NEVER allow children to operate this machine. Do not allow adults to operate this machine without proper instructions.

3. Do not operate when children and/or others are present. Keep children out of the work area and in the watchful care of a responsible adult other than the operator. Be alert and turn machine off if a child enters the area.

4. DO NOT allow children to ride or play on the machine, it is not a toy.

5. DO NOT operate the machine under the influence of alcohol or drugs.
6. If the operator(s) or mechanic(s) cannot read English, it is the owner's responsibility to explain this material to them.

7. DO NOT wear loose fitting clothing. Loose clothing, jewelry or long hair could get tangled in moving parts. Do not operate the machine wearing shorts; always wear adequate protective clothing including long pants. Wearing safety glasses, safety shoes and a helmet is advisable and is required by some local ordinances and insurance regulations.

**WARNING**

Always wear hearing protection. Operating this machine over prolonged periods of time can cause loss of hearing.

8. Keep the machine and attachments in good operating condition. Keep all shields and safety devices in place. If a shield, safety device or decal is defective or damaged, repair or replace it before operating the machine.

9. Thoroughly inspect the area where the equipment is to be used and remove all foreign objects.

10. Fuel is flammable; handle it with care. Fill the fuel tank outdoors. Never fill it indoors. Use a funnel or spout to prevent spillage. Clean up any spillage before starting the engine.

11. DO NOT add fuel to a running or hot engine. Allow the engine to cool for several minutes before adding fuel. Never fuel indoors or inside enclosed trailers.

12. If fuel is spilled, do not attempt to start the engine but move the machine away from the area of spillage and avoid creating any source of ignition until the fuel vapors have disappeared.

13. See Section 5.3 ENGINE FUEL SYSTEM for fueling procedure.

14. Keep flammable objects (cigarettes, matches, etc.), open flames and sparks away from the fuel tank and fuel container. Use only approved containers.

15. Do not operate without the debris bag installed.

16. Check the debris bag and components frequently for signs of wear or deterioration and replace as needed to prevent injury from thrown objects going through weak or torn spots.

17. Never attempt to make any adjustments while the engine is running unless specifically recommended by the manufacturer.

18. Check the engine mounting bolts at frequent intervals for proper tightness.

### 2.4 OPERATION CONSIDERATIONS

1. Know the function of all controls and how to stop quickly in case of an emergency.

2. Do not carry passengers.

3. Do not overload the machine by attempting to chip or shred any material beyond the manufacturer's recommendation.

4. Do not operate on slopes if you are uneasy or uncertain. Ultimate responsibility for safe operation on slopes rests with the operator.

5. Exercise extreme caution when operating on slopes. Keep all movements slow and gradual. Be sure of your footing.

6. Do not turn on slopes unless absolutely necessary. Turn slowly and downhill when possible.

7. Do not operate on steep slopes. Poor footing could cause a slip and fall accident.

8. When using this machine, never direct the material being collected toward bystanders or allow anyone near the machine while in operation.

9. Do not operate around cars, windows, or other items which could be injured or damaged by blown debris.

10. Before attempting to start the engine, inspect the machine, debris bag, shields and safety devices for any damage. Correct any problems before operating.

11. If the vacuum ever plugs, shut off the engine, and wait for all movement to stop before removing the obstruction.

**WARNING**

DO NOT use your hand to dislodge the clogged material. Use a stick or other device to remove clogged material after the engine has stopped running and the vacuum fan has stopped turning.

12. Stop the engine when crossing gravel drives.

13. If the machine begins to vibrate abnormally, shut the machine off immediately. Inspect the machine and have repairs made before restarting.

15. Do not operate near drop-offs, ditches or embankments. You could lose your footing, balance or drive the machine off the edge.

16. Use only in daylight or good artificial light.

17. Do not leave the machine unattended.

18. The machine and attachments should be stopped and inspected for damage after striking a foreign object, and damage should be repaired before restarting and operating the machine.

19. Keep hands and feet away from vacuum intake and outlet. Contact can injure.

20. Keep hands and feet away from all other moving parts. Contact can injure.

21. Use extra care when loading or unloading the machine into a truck or trailer.

22. Tie the machine down securely using straps, chains, cable, or ropes. Both front and rear straps must be directed down and outward from machine.

23. Use care when approaching blind corners, shrubs, trees, or other objects that may obscure vision.

24. NEVER leave the machine running unattended.

2.5 MAINTENANCE CONSIDERATIONS & STORAGE

1. Do not straighten or weld the blower fan. Replace damaged or failed blower fans.

2. Never make adjustments to the machine with the engine running unless specifically instructed to do so. If the engine is running, keep hands, feet, and clothing away from moving parts.

3. Disconnect spark plug wire to prevent accidental starting of the engine when servicing or adjusting the machine. Wait for all movement to stop before adjusting, cleaning or repairing.

4. Keep all nuts, bolts and screws tight, to ensure the machine is in safe working condition.

5. Do not change the engine governor settings or overspeed the engine. See the engine operator's manual for information on engine settings.

6. To reduce fire hazard, keep the muffler and engine free of grass, leaves, excessive grease, oil and dirt.

7. Park the machine on level ground.

8. NEVER allow untrained personnel to service the machine.

9. Keep all parts in good working condition. Replace all worn or damaged decals.

10. Use jack stands to support components when required.

11. Let the engine cool before storing.

12. DO NOT store the machine near an open flame.

13. Shut off fuel while storing or transporting.

2.6 USING A SPARK ARRESTOR

The engine on this machine may not be equipped with a spark arrestor muffler. It is in violation of California Public Resource Code Section 4442 to use or operate this engine on or near any forest covered, brush covered or grass covered land unless the exhaust system is equipped with a spark arrestor meeting any applicable local or state laws. Other states or federal areas may have similar laws. Check with your state or local authorities for regulations pertaining to these requirements.

2.7 SPARK IGNITION SYSTEM

This spark ignition system complies with Canadian ICES-002.
2.8 SAFETY AND INSTRUCTIONAL DECALS

**CAUTION**
WEAR PROTECTION FOR HEARING, VISION & BREATHING.

**DANGER**
ROTATING BLOWER BLADES & FLYING MATERIAL CONTACT CAN INJURE:
- Do not operate without entire debris bag & bag adapter installed & the zipper fully closed.
- Stop engine before removing bag adapter or opening bag.
- Stop engine & remove spark plug wire before any adjustment, maintenance or repair.
- Do not vacuum any debris that is burning, wet, flammable, explosive, or poisonous.
- Keep bystanders away.
- Read operator's manual.
SPECIFICATIONS

3.1 ENGINE

General Type ................................................................. Heavy Duty Industrial/Commercial Gasoline
Brand ................................................................................................................. Subaru
Engine Model:
(Scag Giant-Vac Model YV14-EA190) ....................................................... Subaru Model # EA190V
Displacement:
  Subaru EA190V ......................................................................................... 189cc
Cylinders ............................................................................................................. 1 with Cast-Iron Sleeve
Governor .............................................................................................................. Centrifugal Flywheel Type Set At 3,600 RPM (+/- 100 RPM)
Idle Speed:
  Subaru .............................................................................................................. 1,400 RPM (+/- 150 RPM)
Carburetor .......................................................................................................... Float Type
Fuel ...................................................................................................................... Non-Leaded Gasoline with a Minimum Octane Rating of 87
Fuel Capacity ...................................................................................................... 0.22 Gallon (0.85L)
Lubrication Type ................................................................................................. Mechanical Splash Type
Oil Capacity ......................................................................................................... 0.63 Quart (0.6L)
Starter:
  Subaru .............................................................................................................. Recoil Starter
Ignition System .................................................................................................... Solid State Transistorized Magneto
Air Filter .............................................................................................................. Foam

3.2 BLOWER

Impeller Diameter ......................................................................................... Balanced 14" Welded Steel with Tapered Locking Hub
Number of Blades ............................................................................................... 4
CFM (cubic feet / min.) ...................................................................................... Rear

3.3 WEIGHTS AND DIMENSIONS

Length .................................................................................................................. 64"
Width .................................................................................................................... 26-1/4"
Height ................................................................................................................... 38" up to 47-1/4"
Weight .................................................................................................................. 135#
Wheels:
  (2) Front ....................................................................................................... 14" x 2" No-Flat w/Roller Bearings
  (2) Rear ....................................................................................................... 14" x 2" No-Flat w/Roller Bearings
CAUTION

Do not attempt to operate this machine unless you have read this manual. Learn the location and purpose of all controls and instruments before you operate.

4.1 CONTROLS AND INSTRUMENT IDENTIFICATION

Before operating the yard vacuum, familiarize yourself with all yard vacuum and engine controls. Knowing the location, function and operation of these controls is important for safe and efficient operation.

1. Engine Control (Figure 4-1). The engine control is used to start, stop and control the engine speed. Push the lever all the way forward to engage the engine choke before pulling the recoil starter when starting a cold engine. Once the engine starts, pull the control back to the detent for full engine speed. Pulling the lever back will decrease the engine speed. Pulling the lever all the way back will stop the engine.

2. Fuel Control Lever (Figure 4-1). Used to control the fuel supply to the engine.

3. Height Control Lever (Figure 4-1). Used to control the height of the vacuum intake. Lift up on the handle bar and squeeze the height control lever to release the locking pin. Raise and lower the handle bar until the desired inlet height has been obtained. Release the height control lever.

Figure 4-1. Controls and Instruments
4.2 INITIAL RUN-IN PROCEDURES

FIRST DAY OF USE OR APPROXIMATELY 20 HOURS

1. Change the engine oil and oil filter after the first 20 hours of operation. (See Section 5.2.)
2. Check for loose hardware. Tighten as needed.

4.3 STARTING THE ENGINE

1. Move the machine to a flat open area.
2. Be sure the fuel control lever, located on the left side of the engine, is completely open. See Figure 4-1.
3. Debris bag and adapter must be fully installed to actuate the interlock switch allowing the engine to start and run.
4. Move the engine throttle control to about half engine speed. If starting a cold engine, move the engine control all the way forward to engage the choke.
5. Pull the recoil starter on the engine.
6. Allow engine to warm before operating the yard vacuum.

4.4 OPERATION

This yard vacuum has been designed to pick up dry organic debris such as leaves, grass clippings, shavings and saw dust as well as debris mixed with cans, bottles and small amounts of sand. Vacuuming hard non-organic material will affect the life of your machine. Sand is abrasive and will produce wear of items including the blower housing, impeller and bag adapter.

WARNING

DO NOT operate the machine without the entire debris bag and bag adapter installed and the zipper fully closed. Always wear eye, ear and breathing protection when operating machine.

1. Adjust the height of the vacuum inlet. For maximum debris pickup, the inlet should be as close to the debris as possible without blocking airflow and the engine speed should be set to "Fast".
2. Inspect the debris bag. It must be properly attached to the machine, in good condition, clean and dry with the top zipper fully closed. Make sure that the accessory plug is installed into the front hole in the vacuum nozzle.
3. Not all debris pick up will require that the engine speed be set to "Fast". You can experiment with the vacuum inlet height and engine speed to best suit your conditions.
4. Operating in dry dusty conditions may require that the engine speed be set to the "Slow" position. The debris bag can quickly become plugged with fine dust reducing vacuum action. A zippered vent flap has been provided on the side of the debris bag. It can be opened to improve air flow. Do not open when the engine is running.
5. For peak performance, keep the debris bag clean and do not overfill. The bag must be completely dry before use.

WARNING

DO NOT remove the bag adapter from the machine or open debris bag with the engine running. STOP the engine and allow all rotation to stop.

6. If the vacuum intake or discharge becomes plugged, shut off the engine and remove the spark plug wire. The engine must come to a complete stop before removing the debris bag or attempting to remove plug from inlet or discharge area. Using a stick or similar item, dislodge the clogged material. Then resume normal operation.
7. Plan how to clear a yard or parking lot to reduce clearing time.
8. Keep vacuum intake and discharge clean.
9. Use a slow travel speed when clearing heavy or large amounts of material.

4.5 HILLSIDE OPERATION

**WARNING**

DO NOT operate on steep slopes. Poor footing could cause a slip and fall accident. ALWAYS FOLLOW OSHA APPROVED OPERATION.

1. Do not operate on slopes if you are uneasy or uncertain. Ultimate responsibility for safe operation on slopes rests with the operator.
2. Be sure of footing on slopes.
3. Caution must be used when operating on slopes, especially when the grass is wet. Wet grass reduces traction and control.
4. To prevent tipping or loss of control, keep all movements on slopes slow and gradual.
5. Do not turn on slopes unless necessary, and then turn slowly and down hill when possible.
6. Be alert for holes, rocks, roots and other hidden hazards in the terrain. Uneven terrain could cause a slip and fall accident.

4.6 PARKING THE YARD VACUUM

1. Park the machine on a flat, level surface only. Do not park the machine on an incline.
2. Pull the engine control all the way back to the OFF position.

4.7 AFTER OPERATION

1. After the engine has cooled down, wash the entire machine after each use. Do not use high pressure spray or direct the spray onto electrical components.

    **- IMPORTANT -**
    
    Do not wash a hot or running engine. Cold water will damage the engine. Use compressed air to clean the engine if it is hot.

2. Keep the entire machine clean to inhibit serious heat damage to the engine.

**DANGER**

To avoid injury from burns, allow the engine to cool before removing the fuel tank cap and refueling.

4.8 REMOVING CLOGGED MATERIAL

**DANGER**

ROTATING FAN BLADES

NEVER PUT YOUR HANDS INTO THE VACUUM INTAKE OR DISCHARGE FOR ANY REASON!

Shut off the engine, remove the spark plug wire and only then use a stick or similar object to remove material if plugging has occurred.

1. If the vacuum intake or discharge becomes plugged, shut off the engine and remove the spark plug wire. The engine must come to a complete stop before removing the debris bag or attempting to remove plug from inlet or discharge area. Using a stick or similar item, dislodge the clogged material. Then resume normal operation.

4.9 VACUUM HOSE KIT (OPTIONAL ACCESSORY)

A vacuum hose kit is available that plugs into the front of the yard vacuum. The hose allows easy access for hard to reach places. Contact your authorized Scag Giant-Vac dealer for information.

</table>

* Perform these maintenance procedures more frequently under extreme dusty or dirty conditions.
5.2 ENGINE OIL

A. CHECKING ENGINE CRANKCASE OIL LEVEL

The engine oil level should be checked after every 8 hours of operation or daily as instructed in the Engine Operator’s Manual furnished with this vacuum.

B. CHANGING ENGINE CRANKCASE OIL

After the first 20 hours of operation, change the engine crankcase oil and replace the oil filter. Thereafter, change the engine crankcase oil after every 100 hours of operation or bi-weekly, whichever occurs first. Refer to the Engine Operator’s Manual furnished with this vacuum for instructions.

5.3 ENGINE FUEL SYSTEM

DANGER

To avoid injury from burns, allow the mower to cool before removing the fuel tank cap and refueling.

A. FILLING THE FUEL TANK

Fill to the top of the fuel filter screen (approximately 1/4 gallon) at the beginning of each operating day. Do not overfill. Use clean, fresh unleaded gasoline with a minimum octane rating of 87 and a maximum of 10% Ethanol.

DO NOT use E85 Fuel. Using E85 Fuel will cause severe damage to the engine.

To avoid personal injury or property damage, use extreme care in handling gasoline. Gasoline is extremely flammable and the vapors are explosive.

1. Extinguish all cigarettes, cigars, pipes and other sources of ignition.
2. Use only an approved gasoline container.
3. When filling the fuel tank, always use the fuel filter screen.

4. Never remove the gas cap or add fuel with the engine running. Allow the engine to completely cool before fueling.
5. Never fuel the machine indoors or in an enclosed trailer.
6. Never store the machine or fuel container where there is an open flame, spark or pilot light such as on a water heater or other appliances.
7. Never fill containers inside a vehicle or on a truck or trailer bed with a plastic liner. Always place containers on the ground away from your vehicle before filling.
8. Remove the machine from the truck or trailer and fuel on level ground. If this is not possible, then refuel the machine with a portable container, rather than from a gasoline dispenser nozzle.
9. Keep the nozzle in contact with the rim of fuel tank or container opening at all times until fueling is complete. Do not use a nozzle lock-open device.
10. If fuel is spilled on clothing, change clothing immediately and wash affected skin.
11. Replace gas cap and tighten securely.

5.4 ENGINE AIR CLEANER

A. CLEANING AND/OR REPLACING AIR CLEANER ELEMENT

For any air cleaner, the operating environment dictates the air cleaner service periods. Inspect and clean the air cleaner element after every 50 hours of operation or monthly, whichever occurs first and replace the element if required or every 200 hours. Refer to the Engine Operator’s Manual furnished with this vacuum for instructions.

- NOTE -

In extremely dusty conditions it may be necessary to check the element once or twice daily to prevent engine damage.

5.5 WHEELS

Check the condition of wheel assemblies after 8 hours of operation or daily.
ILLUSTRATED PARTS LIST

6.1 SCAG GIANT-VAC APPROVED ATTACHMENTS AND ACCESSORIES.

Attachments and accessories manufactured by companies other than Scag Giant-Vac are not approved for use on this machine.

YARD VACUUM DECALS

DANGER

- Rotating blower blades & flying material contact can injure
- Do not operate without entire debris bag & bag adapter installed & the zipper fully closed.
- Stop engine before removing bag adapter or opening bag.
- Stop engine & remove spark plug wire before any adjustment, maintenance, or repair.
- Do not vacuum any debris that is burning, wet, flammable, explosive, or poisonous.
- Keep bystanders away.
- Read operator’s manual.

CAUTION

Wear protection for hearing, vision & breathing.
LIMITED WARRANTY - YARD VACUUM

Any part of the Yard Vacuum manufactured by Scag Giant-Vac and found, in the reasonable judgment of Scag Giant-Vac, to be defective in materials or workmanship, will be repaired or replaced by an Authorized Scag Giant-Vac Service Dealer without charge for parts and labor during the periods specified below. This warranty is limited to the original purchaser and is not transferable. Proof of purchase will be required by the dealer to substantiate any warranty claims. All warranty work must be performed by an Authorized Scag Giant-Vac Service Dealer.

This warranty is limited to the following specified periods from the date of the original retail purchase for defects in materials or workmanship:

- Wear items including impellers, debris bags, wear liners, bearings and tires are not included in this warranty.
- Frame, blower housing, structural components including the handle assembly and throttle cable are warranted for one (1) year (parts and labor) for commercial use or two (2) years (parts and labor) for non-commercial use.
- Engines and electric starters are covered by the engine manufacturer's warranty period. Therefore, there are no warranties made, expressed or implied, for engines by Scag Giant-Vac.
- Any Scag Giant-Vac product used for rental purposes is covered by a 90 day warranty.

The Scag Giant-Vac Yard Vacuum, including any defective part must be returned to an Authorized Scag Giant-Vac Service Dealer within the warranty period. The expense of delivering the yard vacuum to the dealer for warranty work and the expense of returning it to the owner after repair will be paid for by the owner. Scag Giant-Vac's responsibility is limited to making the required repairs and no claim of breach of warranty shall be cause for cancellation or rescission of the contract of sale of any Scag Giant-Vac product. “Non-Commercial” use is defined as a single property owner, where the single property is the residence of the owner of the Scag Giant-Vac product. If the yard vacuum is used on more than the owners single property, it is deemed commercial use and the “non-commercial” warranty does not apply. Scag Giant-Vac reserves the right to deny and / or void the non-commercial warranty if it believes it to be in commercial use.

This warranty does not cover any product that has been subject to misuse, neglect, negligence, or accident, or that has been operated in any way contrary to the operating instructions as specified in the Operator’s Manual. The warranty does not apply to any damage to any yard vacuum that is the result of improper maintenance, or to any yard vacuum or parts that have not been assembled or installed as specified in the Operator's Manual and Assembly Manual. The warranty does not cover any yard vacuum that has been altered or modified, changing performance or durability. In addition, the warranty does not extend to repairs made necessary by normal wear, to items subject to abrasion wear, or by the use of parts or accessories which, in the reasonable judgment of Scag Giant-Vac, are either incompatible with the Scag Giant-Vac Yard Vacuum or adversely affect its operation, performance or durability.

Scag Giant-Vac reserves the right to change or improve the design of any product without assuming any obligation to modify any product previously manufactured. All other implied warranties are limited in duration to the one (1) year warranty commercial use, two (2) years for non-commercial use or ninety (90) days for yard vacuum used for rental purpose. Accordingly, any such implied warranties including merchantability, fitness for a particular purpose, or otherwise, are disclaimed in their entirety after the expiration of the appropriate warranty period. Scag Giant-Vac's obligation under this warranty is strictly and exclusively limited to the repair or replacement of defective parts and Scag Giant-Vac does not assume or authorize anyone to assume for them any other obligation. Some states do not allow limitation on how long an implied warranty lasts, so the above limitation may not apply to you.

Scag Giant-Vac assumes no responsibility for incidental, consequential or other damages including, but not limited to, expense for gasoline, expense of delivering the yard vacuum to an Authorized Scag Giant-Vac Service Dealer and expense of returning it to the owner, mechanic's travel time, telephone or telegram charges, rental of a like product during the time warranty repairs are being performed, travel, loss or damage to personal property, loss of revenue, loss of use of the yard vacuum, loss of time or inconvenience. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
